Results in about

an hour

Comprehensive

results in a single report

# **Traditional Stool Testing Methods**

Traditional methods of pathogen identification can be time consuming and lack sensitivity.<sup>3</sup>

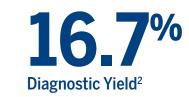

Multiple testing methods

Takes hours to days

Multiple reports

#### Compared to traditional stool testing methods, the BIOFIRE® GI Panel has demonstrated:

Increased diagnostic yield Detects >30% more possible pathogens<sup>2</sup>

Greater laboratory efficiency Reduces time to results by 84%

Improved laboratory workflow Reduces the number of stool tests per patient from ~3 to 14

#### **Improve Patient Care**

In addition, the BIOFIRE GI Panel empowers clinicians with the results they need to make timely, targeted treatment decisions, ultimately reducing antibiotic days, length of stay, and unneeded downstream procedures.<sup>3,4,5,6</sup>
